FOR IMMEDIATE RELEASE

INDEX ENGINES WINS LTN AWARD

Tape Engine Awarded Bronze in the Records Management Software Category

HOLMDEL, NJ — December 8, 2008 — Index Engines, the leader in enterprise discovery solutions, today announced that the Tape Engine product has been recognized by Legal Technology News (LTN) for its capabilities in records management. The Sixth Annual LTN Technology Awards recognize leaders in technology innovation serving the legal community. The selection process for these awards is based on the publication's more than 40,000 subscribers voting for technology that represented outstanding achievement in legal technology. Read more about the 2008 LTN Awards at www.lawtechnews.com/awards.

"We are pleased that the Tape Engine has been recognized by LTN and its readers," said Jim McGann, VP of Marketing for Index Engines. "By allowing quick and easy access to information on backup tapes, our technology makes both eDiscovery and records management processes more effective and intelligent. As IT and legal teams work together more, solutions that solve problems for both departments, like the Tape Engine, will continue to be in great demand."

Index Engines Tape Engine is an appliance that automates the process of searching and extracting data from offline tapes without the original backup software. Using the Tape Engine, offline tapes are directly indexed and the data is immediately searchable. Users can quickly find what they need, restoring only relevant files and email, rather than restoring the entire tape contents, indexing the data, and then commencing the search process. No other solution can directly index tape content allowing for full text and metadata search.

About Index Engines

Founded in 2003, Index Engines is the leader in enterprise discovery solutions. Our mission is to organize enterprise data assets, making them immediately accessible, searchable and easy to manage. Businesses today face a significant challenge organizing their files and email to ensure timely and cost efficient access, while also maintaining compliance to regulations governing electronic data. Companies rely on Index Engines solutions for comprehensive insight into their data to simplify information discovery, classification and management.

The patent-pending Index Engines discovery platform is the only solution on the market to offer a complete view of electronic data assets. Online data is indexed in-stream at wire speed in native enterprise storage protocols, enabling high-speed, efficient indexing of proprietary backup and transfer formats. Index Engines' unique approach to offline records scans backup tapes, indexes the contents and extracts relevant data, eliminating the time-consuming restoration process. Index Engines provides the only comprehensive discovery platform across both online and offline data, saving time and money when managing enterprise information.
